Hi Ella

We were thinking of focusing on the CAD presentation for the Feb. meeting and then the different technologies for treatment for the March meeting. It would be great if you could reach out to Cement Lock for the March meeting. On the agenda for the Feb meeting is also the debriefing from the meeting with RA Enck and likely an update on the processing facility location and CHASP changes.
Thanks, Debbie

Alice:

In one of the e-mails, Debbie mentioned that I would want the Cement-lock group to make a presentation to the CAG as well. I am sure they would make every effort to participate in our February CAG meeting.

Please let me know if there is time for their presentation., and I will see who can attend.

Ella Filippone

Thanks for all this Alice, at this point it is best for the CAG that you stay on top of it and coordinate the experts if you have the time. I am happy to help as well but will be out of the country much of the next two weeks

thanks
Doug

Tom Fredette and Paul Schoeder are both with USACE ERDC (Engineer Research and Development Center) in Virginia (or somewhere thereabouts).

Tom has experience with CAD in Providence River and Boston Harbor, while Paul has experience with the New Bedford Harbor CAD and others. I have not worked with them personally, but my contact in USACE-ERDC asked them yesterday if they would be willing to speak to the CAG (in general - I have not discussed dates with them). Paul said yes so far.

Let me know if you would like to contact them yourself (I need to ask for their contact info) or if you would like me to continue.

Alice

Thanks for staying on top of this. I do believe folks would like BioGenesis to still attend. I have copied Ella on this email, as she wanted to invite the folks from Cement Lock, but I am not sure of the status on that.

I think the other expert we need to bring in is someone on CDFs/CADs.but we have not been able to really generate some good ideas at the Technical Committee level.

Debbie

Now that the February CAG meeting is 2/16 (not 2/17), I may need to double check on Biogenesis' availability, if you would still like them to come in to speak to the CAG.

I did give them the 3/10 date for the March CAG meeting and they said that they were definitely available for that (again, if you want them).

I also have contacts at Volcano, the company that is sponsoring the thermal technology, if you would like to give both technologies a chance to make a presentation at the same CAG meeting.

Please let me know what you would like to do (I'm afraid that February is just around the corner).

Subject: Biogenesis for CAG presentation

At the last CAG meeting, the CAG also expressed an interest in meeting with Biogenesis to discuss the sediment washing technology. I wanted to let you know that John Sontag and Charles Wilde of Biogenesis are available to make a presentation to the CAG at the February meeting (2/17) -- they sent regrets that they had a conflict on 1/13. Let me know if you'd like them to speak at the Feb meeting.
